Experience

Student

freeCodeCamp
07/2022 - 12/2022

- Learned the fundamentals of JavaScript including variables, arrays, objects, loops, and functions.
- Created algorithms to manipulate strings and various data types.
- Learned two important programming styles or paradigms: Object Oriented Programming (OOP) and Functional Programming (FP).
- Learned how to write back-end apps with Node.js and npm.
- Built web applications with the Express framework and built microservices with MongoDB and the Mongoose library.

Student

Classic Systems Infotech Limited • Ile-Ife, Osun state
09/2020 - 12/2020

- Enrolled in the computer repair course and the graphic design course.
- Analyzed system hardware and software and made suggestions for improvements to lessen lag and increase speed.
- Clearly explained technical knowledge to non-technical people to foster better understanding.
- Used computer built-in diagnostic tools & external software to identify hardware failures and replace non-functional components.
- Gained understanding of the many graphic design concepts and principles in the graphic design course, as well as how to use graphic design tools to put my knowledge into practice.

Skills

Computer literacy, Creative thinking, Teamwork, Research, Problem-solving, Programming(JavaScript, Python), Time management, Computer Repair, Technical Writing, Graphic Design

Education

Computer Science and Mathematics

Languages

English, Yoruba

Certificates

Back End Development and APIs(freeCodeCamp), JavaScript Algorithms and Data Structures(freeCodeCamp), Hardware Engineering(Classic Systems Infotech), Graphic design(Classic Systems Infotech)
